

Why We Talk About Money

Money talks and so should we! We are creating spaces for **intergenerational conversations** where students, parents, and educators go beyond financial literacy to build financial resilience. Together we look at money as a tool and financial decision-making as a personal path. As a community we develop an **understanding of our personal relationship with money**, new ways of thinking and talking about money, and the skills **to take action and advocate for ourselves and others**.

Making Change Happen Together

Afterschool and community-based education experiences are a **time for learners to take the stage as leaders** sharing connections between financial topic explorations, self-identity, values-based decision-making and social change. Our surveys show that community-based financial education programming can **improve learning relationships, decrease stress, and increase understanding of financial concepts**. Together we can find our rhythm with finance and create change.
